Plant Is Doing Good Work-Shipment of Concentrates Being Made.

NEVADA - UTAH MATTERS

NEW MANAGER TO ESTABLISH OFFICES HERE.

At the Daly-Judge company's mill the process of adjustment is still progressing and Secretary G. W. Lam- New General Manager Will Open Of bourne, who returned from camp

waid Mr. Lambourne, "in the assay value of the tailings than anything else, and I am able to say that the losses are being reduced to a point that is most satisfactory. It will take some little time yet to get everything down pat, but the headway being made by Superintendent J. T. Kescel is steady and sure. As soon as everything is working to his satisfaction he will begin adding to the tonnage and keep adding until the capacity of the plant has been reached."

Shipping from the plant has commenced and, while no contract for the concentrate product has yet been signed up and may not be for some little time to come, the company is not worrying on that account. Shipments now being made will aid materially in helping the mine and smelter managements to get together, as both sides will know positively just what to figure upon.

In the mine Foreman John McSorley is still pushing development and at the same time is beginning to feel" some of the shoots of ore opened on the 1,400 and other leve's.

From the way things look the 1,400

among other things, he has decided to place a most competent and experienced engineer in full charge of the company's place a most competent and experienced and splace a most competent and experienced engineer in full charge of the company's affairs as general manager with head-quarters in this city.

In pursuance of President Weir's determination, it is stated that a write of the emost central business blocks and that, when they are opened, all matters pertaining to the operation of the emost central business blocks and that, when they are opened, all matters for the most central business blocks and that, when they are opened, all matters for the most central business blocks and that, when they are opened, all matters for the most central business blocks and that, when they are opened, all matters for the most central business blocks and that, when they are opened, all matters for the company will be taken care of on this end of the line rather that, when they are opened, all matters for

opened on the 1,400 and other leve's From the way things look the 1,400 west workings are going to furnish considerable first-class shipping ore, but it is yet too early to even guess what stoping operations are going to disclose, as a start in this direction has barely been made. It will probably be a month or two, yet, before mining and milling is in full swing at

CONDITIONS AT ONTARIO.

### Progress Is Still Being Made in Tunnel Clean-Up.

cleaning out of the tunnel.
"We have not got into the side drift where the water broke through," said Mr. Rood, "but we are nearing it. A great mass of rock and debris that has evidently sloughed off from the roof and sides of the tunnel and which is banked up to of the tunnel and which is banked up to a height greater than the original size of the tunnel is now ahead of the men. Rushing through and over this mass is a volume of water equivalent to the normal flow of the mine, but what is beyond we do not know. There is no evidence where the work is now going on that a cave has occurred, nor is there anything to indicate that one may occur. The ground seems solid and safe and fair progress is being made in the advance through it."

Asked if he had heard anything concerning the reported deal for the property from the east, Mr. Rood said he had not. If anything of the kind reported was going on the local offices had not been advised of it and he had no idea that they would be. The impression still prevails in brokerage circles, however, that negotiations of some character are pending and he belief is that the "cat will be out of the bag" before long.

## EXCITEMENT AT GOLDFIELD.

### Stock Speculation Has Caused Camp to Forget the Mines.

(Special to The Herald.) Goldfield, Nev., Jan. 11.—All interest in the mines has been lost this week. While practical mining men and prospects have wended their way to the boom camp of Manhattan and were all excited about the new discoveries, the rooms of the the new discoveries, the rooms of the local stock exchange have been the scene of unprecedented excitement every day, and each day the excitement has been on the increase. Last week 563,878 shares of stock changed hands at a cost of \$112,352.75, on the Goldfield exchange alone, and probably a larger number were handled in San Francisco. ber were handled in San Francisco.
This week the record for the whole of last week was nearly equaled in a single day. The fact is that the prices of all the listed stocks have been steadly advancing for some weeks. Each day inspired more confidence and each day brought forth some remarkable feature. Flyence one who hought stocks in day brought forth some remarkable feature. Every one who bought stocks in mines or prospects in the known mineralized zones has made money. Many have made fortunes. This is the climax of a long season of development work. In some cases this work has proven the correctness of oft-reiterated theories about the location of ore bodies; in other instances it has served to loan the color of probability to the correctness of these theories.

Mine Conditions Start Things.

Mine Conditions Start Things.

The Red Top is a shining example. A year ago the owners announced that the Red Top had proven to be a mine with a large deposit of low grade ore-ore rurning from \$16\$ to \$30 per ton. There was talk of a mill to handle this low grade ore and promises were held out that the mine would pay dividends in a moderate amount on what it had in sight. This talk hardly interested the camp, and the result was that the price of Red Top stock sank to 4 cents a share. As the talk persisted prices rose to 30 cents, and finally to 35, at which point they held for a long time. On the promise of a trial shipment in August the price advanced to 38 cents. Just as the shipment was about to be made, something happened. For many reasons important to the management an attempt was made to suppress the fact, but the news was too good to keep, it would not down-Red Top had struck fabulously rich ore. Just at that time the camp was becoming used to disappointments; the weather was hot; miners who had been toiling and struggling in unprofitable ground were knocking off; knockers were abroad in the camp and throughout the country; business became comparatively quiet. So the re-

sponse to the Red Top news was luke-warm—the price just barely climbed to 60 cents. Since that time in August the continued development work at the mine has uncovered strike after strike, and the speculating and investing public has had the facts slowly forced home upon them. There is two million dollars' worth of ore in sight in the Red Top.

Some Sensational Advances.

What is true of the Red Top is also true in a measure of several others of the prominent properties, and the result has been a gradual increase in the prices of stocks until, seemingly, the country is again mad with speculation over them. The prices of all have advanced out of all proportion to what they were last summer, and in many cases have doubled since one month ago. No one could lose money buying them. Red Top advanced from 60 cents to over \$2.00; Jumbo, its neighbor, has gone from 70 cents to \$1.50 in spite of all conflicting interests could do to keep it down; Kendall jumped from 14 conts to 65; Sandstorm, from 45 to 80; Diamondfield, from 24 to 50; Goldfield Mining, from 55 to 75; Mohawk, from 25 to 40; Adams, from 4 to 8; Silver Pick, from 8 to 15; Blue Bull, from 7 to 14, and Booth, from 15 to 19.

Frices remained close around the figures of Thursday, with Carisa, Lower Mammoth and a number of other modest-priced stocks a little more than holding their own.

During the forencon an odd lot of Daly-West was taken at \$17.10 and 100 shares of Daly-Judge was secured at \$7.45. Eagle & Blue Bell sold at \$1.85 to \$1.90, and more was sought at the latter figure, but none came out after the transfer of 400 shares. Victoria sold 100 at \$1.95. Little Bell came out sparingly at \$4.50 and Wabash was let down to 80c.

In other respects there was nothing in the action of the market to call for comment, the close being on the following list of quotations and record of sales made during the two regular and open board calls:

Forencon.

### NEVADA-UTAH MATTERS.

fices in Salt Lake.

Thursday night, states that the plant is beginning to do very good work. No attempt has yet been made to reach out for a tonnage, and the amount of ore now being treated varies from 100 to 150 tons per day.

"We are more interested just now," said Mr. Lambourne, "in the assay value of the tailings than anything"

"Ices in Sait Lake.

Word has been received here that Colonel John Weir, president of the Nevada-Utah company, who left here early in December to go to the coast, is again in New York fully recovered from his pulmonary affliction. According to advices he is now planning for the campaign that is soon to be inaugurated at the Pioche properties of his company and that, among other things, he has decided to place a most competent and experienced engineer in full charge of the company's affairs as general manager with head-

### FARISH'S BIG MINE.

### Well Known Engineer Refuses \$4,-000,000 for Mexican Property.

That John B. Farish, the well-known mining engineer, and his associates, have a wonderfuly rich and valuable property in Mexico, is indicated by the following item, taken from the Money Maker, an eastern financial

"John B. Farish, of Denver, and his sociates, have refused an offer of \$4,000,000 in gold for their Dolores mines in Chihuahua, Mexico, it is After discharging the December payroll and looking into the progress that is being made in cleaning out the Ontario drain tunnel, Manager C. L. Rood is back at the company's offices again. He states that while there is nothing particularly new to report from the mine, steady headway is being made in the cleaning out of the tunnel.

"We have not got into the side drift gan extensive development work and stated. It is said the syndicate will gan extensive development work and have brought the mines to a high producing point. They produce both gold and silver, and for eighteen mtnths, it is said, the property cleared \$30,000 a

## STAR CON. IMPROVING.

### Ore Is Being Driven Through on the Four Hundred Level.

Conditions at the Star Consolidated are reported by President H. G. Mc-Millan to be improving all the time. For several days past the mine force has been drifting through ore on the 450-level, and the latest report from Superintendent J. P. Turner indicated that the same are body would be that the same ore body would be caught on the 600 level very soon.

Where encountered the new shoot on the 450-level is said to going up and down strong, while its lateral limits have not yet been determined. All in all, the mine is said to be looking better than it has done for a long time, and the management is more hopeful of the future than ever. It is the improved conditions underground that is responsible for the gradual strengthening of the company's shares on the mining exchange.

## INCREASING CACTUS OUTPUT.

### Mill Is Handling 650 Tons of Ore over their private wire: Daily Now.

After a whirl down to the Cactus and a trip to Bingham Manager Lafayette Hanchett of the Newhouse interests, was a his desk again yesterday. He reports everything moving smoothly at the Beaver county bonanza and states that 65 tons of ore is now going through the mill every twenty-four hours. Before the end of the present month this will be increased to at least 700 tons and a little later in the year it is expected that the great plant will be devouring more than 1,000 tons per day.

At the Boston Consolidated company's new test mill, Mr. Hanchett says, a good start has been made and the plant is already turning out a fine grade of concentrates. Mr. Bettles is still busy at the mill making table and slimer adjustments, but it will not be long till the model little plant is perfectly performing the functions for which it was erected. everything moving smoothly at the Bea

# the Day's Trading.

During yesterday's trading on the mining exchange 66,780 shares of stock, with a selling value of \$13,933.37, changed hands. Prices remained close around the figures of Thursday, with Carisa, Lower Mammoth and a number of other modest-priced stocks a little more than holding their own.

During the forenoon an odd lot of Daly-West was taken at \$17.10 and 100 shares of Daly-Judge was secured at \$7.45. Eagle & Blue Bell sold at \$1.85 to \$1.90, and more was sought at the latter figure, but none came out after the transfer of 400 shares. Victoria sold 100 at \$1.95. Little Bell came out sparingly at \$4.50 and Wabash was left.

The heavy profit taking was not without effect on prices, although the speculation became extremely animated again in the late trading, some of the prominent leaders being rushed to the top level of the day. Notwithstanding this strong demonstration there was some continued irregularity up to the close.

was irregular at times, with an occasional moderate reaction. The rotation of the demand, however, brought into the advance practically all the important stock before the day had passed. There was besides a host of low priced and minor grade stocks ranging all the way down from moderate dividend payers with increasing earnings to warrant expectation of larger dividends, to the grade of securities for which the value of shares beyond that of the paper on which the certificates are printed is questionable.

Individual transactions were on a very large scale and this and the skiliful tactic spursued in the selling to take profits in one quarter of the market while stimulating another quarter by fresh buying were evidences of the large part played by professional operations in the market. There was no news of consequence to explain the day's movement beyond the material relaxation in money and the moderate pressure for remittance abroad which accompanied it. The disregard of the news developments is characteristic of a broad speculation. Special stress was laid upon the prospect of a very strong bank return tomorrow, the forecast of the currency movement indicating a balance of receipts from the interior of upwards of \$2,000,000.

Very large receipts are known to have occurred to Canadian funds. Besides the elastic estimates of the regular currency movement indicating a balance of receipts from the interior of upwards of \$2,000,000.

Very large receipts are known to have occurred to Canadian funds. Besides the elastic estimates of the regular currency movement the official figures of the sub-treasury operations show a gain for the banks up to Thursday night of \$4,22,000.

In addition the sub-treasury showed the extraordinary debit balance today of \$2,229,000, made up of pension payments, government disbusements for transporting the sub-treasury operations show a gain for the banks up to Thursday night of \$4,220,000.

In addition the sub-treasury showed the extraordinary debit balance today of \$2,229,000, made up of

## Are You Engaged?

cent. Oats were down ¼. Provisions showed a loss of 7½012½.

The wheat market opened firm with May unchanged to ½0¼ higher at 88½0 k8½ to 88½. During the first hour there was active buying by commission houses largely based upon an advance in the price of wheat at the principal grain centers of Europe. The strength abroad was attributed to unfavorable weather in Argentina, which is delaying work on the new crop. Influenced by reports of increasing stocks of wheat at Minneapolis local traders sold freely and toward the middle of the session this selling caused a reaction, May declining to 87¼. The easier feeling was due to some extent to reports of the good condition of falisown wheat, On the decline there was much self-great and so good buying by shorts and also good buying by shorts and also good buying by commission houses and finally made her entirely self-great in the action of the session that the principal fall in the avoided, by keeping their digestions that, after marriage, many quarrels can be avoided, by keeping their digestions in good condition with Electric Bitters. S. A. Brown of Bennettsville, S. C., says: "For years, my wife suffered intensely from dyspepsia, complicated with a torpid liver, until she lost her strength and vigor, and became a mere wreather the principal fall in the principal fall in the principal fall in the principal fall in the p

wheat, On the decline there was much covering by shorts and also good buying by commission houses and practically a of the earlier loss was recovered. The market closed fairly firm with May at 172½ 88¼. Clearances of wheat and flour were equal to 338,000 bushels. Primary receipts Have Utridanad in the Want Page?
